School iP

CASE STUDY

Marc Heron, Director of Quality Assurance
Standish Community High School

AT A GLANCE

PREVIOUS CHALLENGES

- Creating reports for appraisals
- Collecting accurate data to make informed decisions
- Managing time efficiently

CURRENT BENEFITS

- SchooliP creates reports with the push of a button, saving precious time
- Decision can be made based on data which is indefinitely stored
- All process are more efficient allowing for better time management

"...Everything being in one place makes performance management a lot easier..."

MARC HERON
Direcor of Quality Assurance
Standish Community High School

OVERVIEW

Standish Community High School is located in the large village of Standish in the Metropolitan Borough of Wigan, Greater Manchester. It has 1,250 students, 11 to 16. Marc Heron, Director of Quality Assurance recently took the time to explain why the implementation of our school improvement solution, SchooliP has led to multiple cost savings at the school.

IMPACT

Marc stated "The summary page means that I can quickly see if anyone still has an open review meaning I can chase the Heads of Departments for any missing observations. Powerful filter tools allow for so many different reports. To do this manually would be a time-consuming data nightmare. I don't know how you could get powerful reports effectively without a system that can filter in the way that SchooliP does. Without it, appraisals would be just about the process rather than the data, which is the valuable part. You could spend hours in Microsoft Excel trying to create the charts that SchooliP automatically gives you"

Marc also added that "Reviews are now completed on time. Previously, it was a nightmare collecting paper copies and emails. These would then have to be checked off against a tick list. Things are now much smoother.."
